The IMAGERY ANALYSIS SERVICE NOTES is a periodic publication of the DDI Imagery Analysis Service, the departmental PI organization of CIA.

This publication highlights significant or timely intelligence items derived from photography.

The interpretations in this publication represent preliminary views which are subject to modification in the light of further information and more complete analysis.

WARNING

This document contains information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793, 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive information in the designated control channels. Its security must be maintained in accordance with regulations pertaining to TALENT-KEYHOLE Control System.

Rail Line Under Construction Near West Pakistan Border

Recent satellite photography reveals that India is constructing a 40-nm rail line between the towns of Pathankot and Jammu, along the border with West Pakistan. Pathankot is the present rail terminus in northwest India. Major military cantonments are in both towns, which are about 12 nm from the Pakistani border, and other military installations are nearby (see Figure 2).

25X1D On photography of [] construction was under way on roadbed along the entire line, a large rail yard at Jammu, and about 60 bridges. A few bridges along the line were completed.

25X1D Portions of the line can be seen under construction on [] 25X1D photography. No construction is visible on the previous coverage, in []
